PROFILE

Software developer and IT engineering student with six years of experience using Unity and C#. Worked on Angry Birds Friends at Rovio and led development on a paid PlayStation game project, implementing game systems and local multiplayer. I bring practical development experience and a willingness to learn.

TECHNICAL SKILLS

Game development: Unity (6 years), C#, game design

Programming & web: C++, Python, Lua, JavaScript, HTML5, CSS3; basic SQL and SQLite

Tools & platforms: GitHub, Jira, Trello, Windows, Linux (Ubuntu, Kali)

EXPERIENCE

PlayStation Game Development Project | Metropolia UAS

Paid project | Summer 2026

- Led development and contributed substantially to game design for a PlayStation game using a PlayStation development kit.
- Implemented most of the game's systems, including local multiplayer features.
- Game is in development, with a showcase planned for Taitaja 2027 highlighting Metropolia student work.

Research Assistant | Merisotakoulu (Finnish Naval Academy)

Military service | Jul 2023 - Mar 2024

- Worked with simulation tools using Python and Lua.

Game Developer | Rovio

Angry Birds Friends team | Jan 2023 - May 2023

- Fixed game bugs and implemented new user experience (UX) solutions.
- Collaborated with large, multilingual teams and learned maintainable coding practices.

Technical Support Engineer Intern | Gigantti Forum

Helsinki, Finland | Jan 2021 - Mar 2021

- Diagnosed customer device issues and guided customers through troubleshooting steps.

EDUCATION

Information Technology Engineering Studies | Metropolia UAS

2024 - Present | Major: Video Game Development

Information and Communication Technology | Helsinki Business College

2020 - 2023 | Focus: Game Development

VOLUNTEERING

Volunteer | IGDA Finland

2023 - Present

Participate in game industry meetings and events to build connections and expand industry knowledge.
